**Increase of
day-ahead volume**

**NEMO Committee
Annual Conference**

**Participation at Sarajevo
Energy and Climate Week**

Trading Report Q3 2024 Day Ahead

From July to October, the total traded volume on the Day-Ahead market was 3.388.317,50 MWh. During this period, the most traded volume was in July with 1.244.597,61 MWh traded, while the other months were not much behind, with 1.152.154,61 MWh traded in August and 991.565,28 MWh traded in September. In the third

quarter of the year 2024 on BSP energy exchange we recorded the highest prices on the Day-Ahead market on trading for the delivery date of September 2nd with 232,77 €/MWh, while the lowest prices were recorded for the delivery date of July 6th with 17,41 €/MWh. The average price for last month's period was 97,93 €/MWh.

Trading Report Q3 2024 Intraday

The strong trading on the Intraday Continuous market continues in July, August and September of 2024. The total traded volume was 302.166,20 MWh. Trading with block products

amounted to 3.236,60 MWh, trading with hourly products amounted to 254.538,60 MWh and trading with Quarterly products amounted to 44.391,00 MWh.

Trading Report Q3 2024 CRIDA

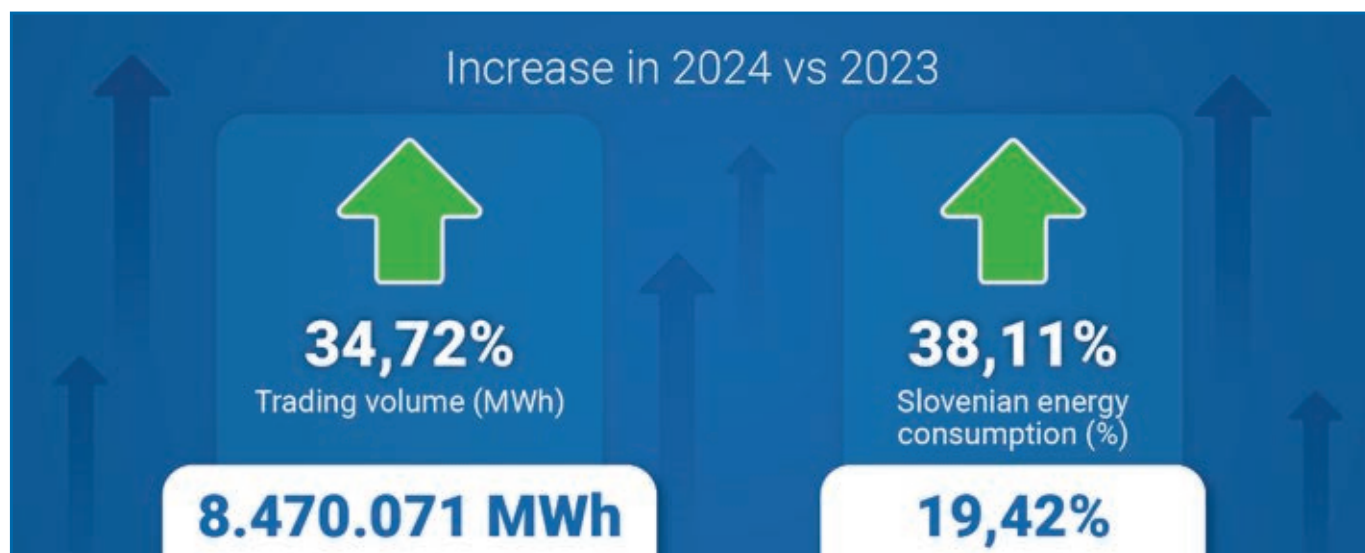

In the middle of the year 2024, the total amount of 98.024,93 MWh was traded on CRIDA auctions. The CRIDA 1 auctions amounted to 15.465,53 MWh traded, CRIDA 2 auctions amounted to 74.085,63 MWh traded, and CRIDA

3 to 8.473,78 MWh traded. The highest volume traded for all the CRIDA auctions combined was 35.827,68 MWh in July, while the lowest volume traded was in August, where the total amount was 29.768,88 MWh.

Increase of day-ahead volume

BSP's day-ahead volume increased by 34.72% compared to last year. From January to August 2024, our trading volume reached an impressive 8,470,071 MWh, compared to 6,287,096 MWh

during the same period last year. The result also implies that trading volume at BSP exceeds Slovenian energy consumption in the observed period by 19.42%.

7917 successful intraday auctions in eight years

We introduced the first European cross-regional Intraday auctions in June 2016 on the SI-IT border. After eight years and 7917 successful intraday auctions, it is our experience that:

- Intraday auctions do not cannibalize intraday continuous trading
- Intraday auction volumes are complementary to volumes at intraday continuous trading
- Intraday auction volumes closely correlate through the CZC

Therefore, BSP welcomes this magnificent milestone in developing a Single European Electricity Market.

NEMO Committee Annual Conference

BSP was a big part of the NEMO Committee Annual Conference. MSc Anže Predovnik, CEO of Adex and BSP, moderated a panel where we heard about optimism, readiness, some scepticism and, most importantly, dedication to de-

liver market coupling projects on the electricity borders of EnC contracting parties – giving us confidence that the goal of market coupling will be achieved.

Participation at Sarajevo Energy and Climate Week

Anže Predovnik, the CEO of BSP and Adex Group, served as a moderator at SECW 2024, where he presented BSP's journey through years of market coupling projects and growth of traded volumes.

He stated: "I am happy to take part in SECW - Sarajevo Energy and Climate Week. BSP is not here to give lectures but rather to become your strategic partner/platform in the process of establishment BiH PX and its integration into IEM."
